

Flexible joint for three-phase rail

Ref. BTT-GB06

Flexible joint for three-phase rail. This accessory is the most versatile of all the brackets we have because being flexible you can put the degree you want, so you can make complex installations with different angles. It is available in white and black. Create a complex network of LED luminaires thanks to this accessory, the three-phase rails and install as many LED projectors as you need without exceeding the 16A of the total installation.
