

**Smart LED Strip IC RGB 5V DC - IP20 - 21,6W/m - 144 LED/m - Width 12mm - 2 meters**

### Ref. B1573RGB

The intelligent RGB LED strip (IC) is designed to operate with a voltage of 5V DC. Each LED chip has its own SMD5050 light source and integrated driver (IC), allowing individual control of each LED in the strip. In this way, the WS2812B LED strip can be programmed to create complex light patterns and customized animation effects. In addition, it is possible to cut the strip into individual sections per chip, allowing for great versatility. It is also possible to extend the strip by 2 meters if necessary.

### Datos del producto

Efficiency (Lm/w)	60
Opening angle (°)	120
LED Type	SMD 5050, RGB IC WS2812b
Power (W)	43,2
Nominal Voltage (V)	5
Use Outdoor	No
IP	IP20
Certificates	CE, ROHS
Warranty	According to legal guarantee: 2 years
No. of chips/metre	144
Track width (mm)	12
