

Round Opal Diffuser Ø40.2mm (BPERFT40)

Ref. BDRGT40

Diffuser for surface or suspension profile of 23x8mm, with reference BDRGT40. The opal of the diffuser provides a better illumination of the LED strips, avoiding glare and without showing the LED chips inside. The profile has an inner width of 18.1mm. The diffuser will help to improve the heat dissipation and lifetime of the LED strips, in addition to achieving opal white for the 20x27mm surface or hanging profile. The opal color better diffuses the light of your LED strips avoiding glare and chips are not seen. Also when using profiles with diffusers we help to a better heat dissipation extending the life of the strips in addition to achieving a more professional and aesthetic installation.
