

Dali Dimmer DC 12-36V 5A/Channel (4 channels in 1)

Ref. SR-2302B

SR-2302B is a constant voltage LED driver with 4 channels, 5A per channel output. With 1 DALI address to control 4 channels synchronously. The DALI address can be assigned manually by the digital number displayed on the screen. It can also be assigned automatically via the controllers. Can be used to control multiple LED strips synchronously. Smooth dimming from 0%-100% with the DALI dimmer by logarithmic dimming, which is perfect for human vision.
