

Power supply 24V DC 6W 0.25A 100-240V

Ref. B1565-6W

24V-DC constant voltage transformer driver with 6W power. Versatile, dustproof, short circuit, over voltage, over power, over current and overheat protection functions. Widely used in 24V-DC LED strips or 24V DC electronic devices. Power supply designed exclusively for indoor, and so with constant output voltage. The electronic protection circuit of the power supply switches off in case of short circuit or overload in the secondary circuit, overheating. After elimination of faults, the LED power supply automatically restarts to operate again. Input 100-240V and output constant voltage at 24V-DC 0.25A.
