

## Streetlight with double solar panel and IP44 sensor

### Ref. SL20

Outdoor double solar lantern. Solar LED lantern for outdoor use with motion and light sensor. With double Solar Reflector of 3.6W of power each and a light intensity of 260 lumens. More energy storage than many others. Maximum height of 190 cm. Wireless connection and equipped with batteries. Automatic charging. Adjustable lighting. SMD 3030 LED chip, high performance. Intelligent light control, automatically charges during the day to illuminate at night. Rechargeable 2600 mAh lithium battery with 30 hours of light when fully charged. Color temperature is cool shade of 6000°K. 120 degree beam opening angle. IP44 protection rating for outdoor use, made of high quality materials.

### Datos del producto

Kelvin (K)	6000
Lumens (Lm)	684
Opening angle (°)	120
Power (W)	2 x 3.6W
Frequency (Hz)	50 - 60
Sensor	Yes
IP	IP44
Charging time (h)	6-8h
