

Three-phase rail adapter connector for luminaires

Ref. BTT-GB10

Turn your lamps into a rail lamp, thanks to the three-phase rail power adapter. This accessory allows you to connect lighting fixtures in linear form, in 1,2 and 3. Made of fireproof thermoplastic, with copper connection, with dimensions 68x58mm. Easy connection of the lamp cable and quick installation to the rail. The rail adapter will allow you to combine all types of LED luminaires both in spotlights, downlights, pendant lamps and emergency lights with a single power line by installing a three-phase surface rail. Available in black and white. Buy the track with ref. BTT-200 (see below in related products).
