

## IP67 watertight sleeve x1m for 10mm LED Strip

### Ref. B1500

IP67 waterproof sleeve for 10mm LED strip for 12 or 24V strips. Price per 1 meter length. Flexible and transparent silicone. Allows to make waterproof any type of LED strip at 12 or 24V. (To achieve the desired degree of watertightness in the LED strip it is essential to place end caps at the beginning and end of the sheath, sealed with silicone, to prevent water from entering inside). Easy to install by means of a guide wire inside. Measures 14x4mm (width x height). The corresponding plugs for this IP67 case are the B1691A-2 (plugs NOT included).
