

## Aluminum profile for flexible swimsuit

### Ref. K1939-PERF

Surface profile for flexible swimsuits model B1939-270 and 1939-RGB. The aluminum profile for flexible swimsuits, allows a simple and elegant installation of the flexible swimsuits. They are specially designed to anchor to walls, floors or other types of surfaces, to securely fix the swimsuits. Perfect for protecting and securing swimsuits, allowing professional, clean and stylish installations. The aluminum surface profile can be used indoors or outdoors. It is U-shaped to improve heat dissipation and extend the life of flexible swimsuits. The profile also helps to avoid direct contact with water and dust. The profile and flexible floodlighting assembly is ideal for illuminating the facades or infrastructure of restaurants, offices, shopping malls, discotheques, fashion stores, etc.
