

### 300W Triac Dimmer - Leading/trailing edge dimming - On/off function

#### Ref. B708

The 300W Triac Dimmer is a dimmer specially designed for LED lighting. This device allows to control the light intensity smoothly and precisely from 0 to 100% by simply turning the circular knob. In addition, it has a toggle switch to switch the LED lighting on and off from two different points in the room, in combination with another toggle switch. It allows to select between regulation by cutting at the beginning of phase (leading edge), admitting loads up to 150W, and at the end of phase (trailing edge), admitting loads up to 300W. \*\* The installation must be performed by a qualified professional or request advice from our technical team\*\*.

#### Datos del producto
