

Recessed PIR motion sensor with remote control - 360° - IP20

Ref. SPS01B

The recessed PIR motion sensor can detect the presence of motion at a coverage angle of 360°, a maximum radius of 25 meters and a height of 2.5 to 7 meters. It includes a remote control that allows adjusting different configuration parameters such as range distance, light level and time. It controls the switching on and off of one or several LED luminaires (up to a total of 1000W) achieving great energy savings.
