

Ceramic pendant lamp holder

Ref. LV122

Pendant lamp holder in white. It has a central hole for the exit of the main cable, plus two lateral ones to link it with other lamp holders and three holes to fix it with screws to the ceiling. All these options allow you to design your own unique style in each recreated space. You can purchase the rosette individually and combine it with the decorative caps that best suit your style. We recommend combining it with our range of vintage LED bulbs, which also provide energy savings thanks to its technology. AVAILABLE COLORS: Yellow, White, Brown, Red and Black. *BULB NOT INCLUDED
