INSTALLATION STEPS

1. Before installing the totem, ensure that the electrical and data cable connections are prepared in the designated area.

2. Anchor the base to the floor using the 8 expansion screws provided. The floor must be solid and level.

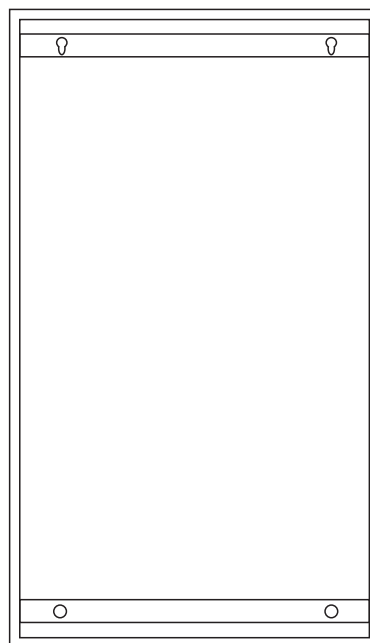

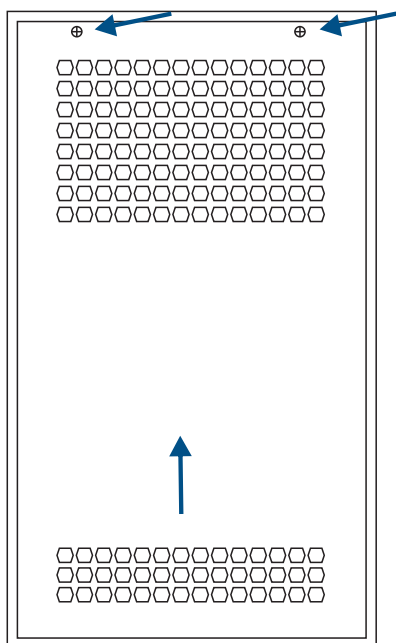

3. Anchor the metal structure support to the base using the 8 screws provided.

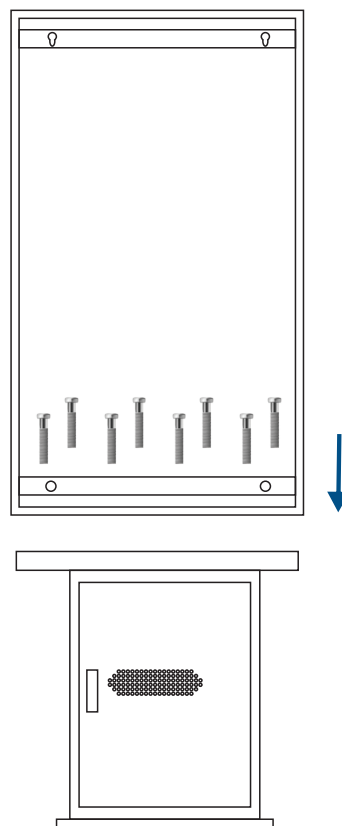

DE55-4K-4+32-V2

4. Remove the rear cover of the metal structure where the screen will be placed. Unscrew the two screws located at the top, then slide the cover upwards to detach it.

5. After removing the cover from the structure where the screen will be placed, anchor the structure to the base fixed to the floor using the 8 screws provided.

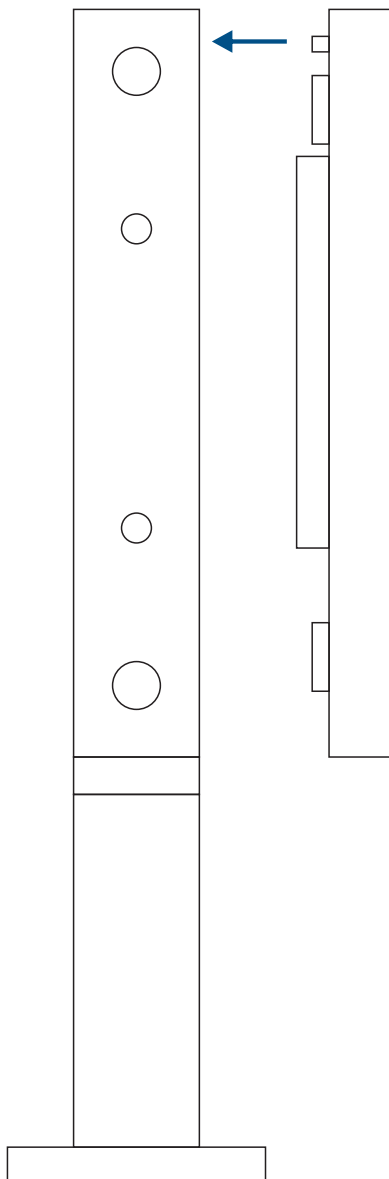

DE55-4K-4+32-V2

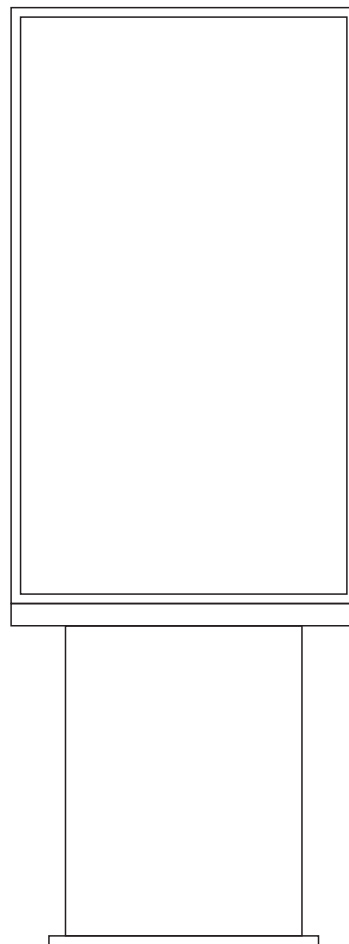

6. Once the entire structure is anchored, proceed to mount the screen. First, remove the two screws from the bottom. Then, with the help of two people, position the screen and secure it by anchoring the top with the two screws into the holes at the top of the structure, as shown in the image.

7. When mounting the screen to the structure, tighten the upper screws and reinsert the lower screws that were removed earlier from the screen.

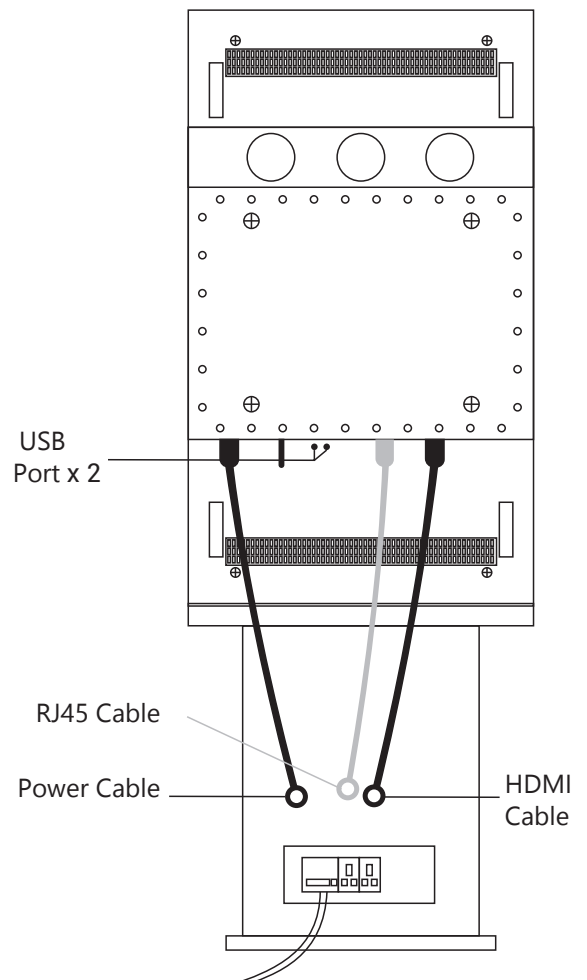

8. Once these 4 screws are tightened, connect the power cable, data cable, HDMI cable, and WiFi antenna.
